

PROBLEM STATEMENT

- **Fragmented ecosystem:** No single platform for landowners, builders, clients, and suppliers.
- **No end-to-end solution:** No platform covers the full journey from land acquisition to construction and final property purchase.
- **Low transparency & efficiency:** Poor communication and middlemen increase cost and delays.

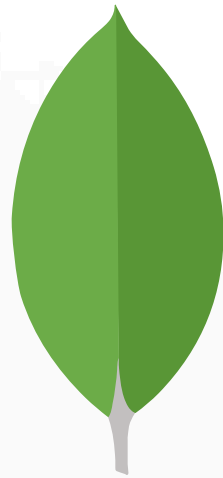

SOLUTION

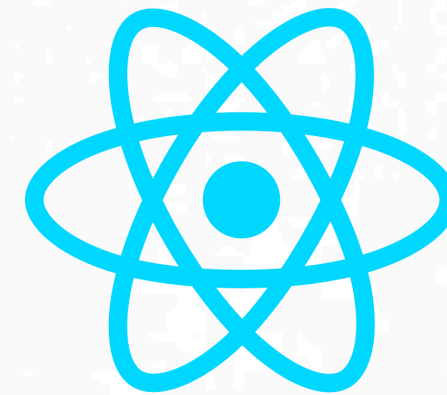

- **Centralized platform:** Connect landowners, builders, buyers, and suppliers.
- **End-to-end workflow:**
From land acquisition → requirement analysis → material procurement → project management.
- Ensure **RERA**-based transparency & security.
- Verified suppliers for **high-quality** materials.
- **Real-time** project tracking & updates for complete visibility across all stages

TECHNOLOGY USED

Mongo DB

React.js

Next.js

Tailwind CSS

Maps

USE CASES / APPLICABILITY

- **Landowners:** List and sell land directly to builders without intermediaries.
- **Builders:** Acquire land, manage projects, and procure materials efficiently in one platform.
- **Buyers (Clients):** Find properties based on preferences with better transparency and trust.
- **Suppliers:** Showcase materials, participate in bidding, and reach multiple builders.
- **Construction Management:** Track project progress, budget, and resources in real time.
- **Smart Decision Making:** Helps stakeholders with insights on pricing, demand, and resource planning.

WHY THIS TECHNOLOGY STACK?

- **Scalability & Performance:** Next.js and Node.js handle large users and real-time data efficiently.
- **Fast & Interactive UI:** React (Next.js) enables smooth, dynamic, and responsive user experience.
- **Flexible Data Handling:** MongoDB supports complex and dynamic data (users, properties, projects).
- **AI Integration Ready:** Gemini API easily integrates for smart recommendations and insights.

EXISTING WORK

- **99acres** – Property listing and search platform
- **MagicBricks** – Buyer-seller interaction with recommendations
- **NoBroker** – Direct owner-to-buyer platform (no brokerage)
- **IndiaMART** – Raw material supplier marketplace
- **Brick And Bolt** - Construction Company
- **Gap in Existing Work:** Lack of a unified platform integrating land , construction, buyers, and suppliers end-to-end.

PROTOTYPE

Prototype Status: No existing prototype available

Approach: A new full-stack prototype will be developed

Development Plan:

Phase 1: Basic modules (user authentication, land listing, property search)

Phase 2: Builder dashboard & material procurement

Phase 3: Bidding system & AI integration

Future Enhancements: Real-time tracking, smart recommendations, and map integration
